SEA AND INLAND FISHERIES OF IRELAND, 1903.

REPORT

TO THE

SECRETARY OF THE DEPARTMENT OF AGRICULTURE
AND TECHNICAL INSTRUCTION FOR IRELAND.

SIR,

We have the honour to submit Part I. of the Report for the year 1903 on the Sea and Inland Fisheries of Ireland.

PART I.—GENERAL REPORT.

GENERAL OBSERVATIONS.

In spite of the storms which prevailed in 1903, it was, from the fisherman's point of view, the best year, except 1899, of the past decade. The money they realized by sale of sea fish amounted to nearly £428,000.

It is obviously a matter of some difficulty to closely approximate the total value of the Irish fisheries. The figure above given is landing value only, but the handling, transit, and other charges which the yield has to bear before it reaches the retailer or leaves the Country, and which represent money left at home, are very considerable; and bearing in mind the increasing value of the Salmon Fisheries, it is probable that the sum of £1,000,000 is the lowest that would represent, this year, the gross value to Ireland of her fisheries.

The mackerel capture showed a considerable improvement, and must, one way or another, have brought in over £200,000. The demand in America at the beginning of the season led to high prices; but unfortunately at the end it declined, and stocks were left on hand.

At the time when the market failed, a new difficulty arose in the United States about the duty to be paid.

Hitherto an import duty of two dollars per barrel has had to be met by the Irish fish landed in America, but a recent decision of the Customs to render the pickle also liable for duty has had the result of adding about another dollar per barrel on all recent consignments. This three dollar duty, if insisted on, will prove a serious blow to the Irish trade, as the difference of a dollar a barrel is often sufficient to close down the whole market and stop the fishing. The Department are endeavouring to secure more favourable treatment for this important trade.

The herring fisheries of the year, though large in quantity, were not, from a money point of view, so good as those of the previous year owing to the bulk of the tako being from those portions of the coast where lower prices prevail.

The system of distributing, by telegraph, to mackerel fishing centres in Ireland semi-weekly information as to the progress of

that industry has been adopted in regard to the herring fisheries. The stations selected were Burtonport, Mulroy, Buncrana, and Portrush on the North coast; Portavogie, Ardglass, Kilkeel, Howth, and Arklow on the East coast; Dunmore East, Helvick Head, Kinsale, and Baltimore on the South coast. There were about 2,100 telegrams containing this class of intelligence despatched from the branch during the year.

The diagram showing the fluctuations in the mackerel and herring fisheries of the Country, which was published in the report for 1901, has been brought up to date of 31st December, 1903, and is annexed.

The capture of prime fish, such as soles and turbot, showed a falling off in 1903, notwithstanding the fact that the trawlers working in the Irish sea met with improved catches of soles.

The steam trawling fleets have devoted more of their time to the capture of coarse fish, such as hake, cod and whiting, than they did in former years; and great catches of the former have been made by English trawlers during the spring months in a depth of 150 fathoms west of the Kerry coast; but they find no place in Irish statistics.

The good prices for lobsters in 1902 would seem to have induced over-fishing, as the supply has not only proved short in 1903, but the lobsters caught on some of the best grounds were of small size. The falling off is represented by the difference between 115,000 dozen and 72,000 dozen. Owing, however, to the method of despatch by well-smacks to England the particulars of large quantities do not appear in our Statistics.

At all the drift-net fishings the steam drifter is coming more and more into evidence; and although a number of Irish boats have, during the year, obtained loans for providing *steam hauling gear*, steam, as a motive power for vessels of this description, has not yet—probably on account of its great expense—been adopted in Ireland.

The Report of the Royal Commission on the pollution of shell-fish was issued during the past year; and it shows that the oyster beds of the West coast of Ireland are singularly free from those forms of pollution which produced such a disastrous scare in the oyster trade.

Instruction in various matters concerning fishing was given at certain places where there seemed to be an opening for improving the existing methods; and a few coopers, whose trade has declined since the failure of demand for butter firkins, were sent to a cooperage owned by the Congested Districts Board to receive the necessary knowledge to enable them to make fish barrels of approved pattern, and so find a new outlet in the fish-curing industry for their trade.

The assistance of a competent instructor was afforded to a Port Ballintrae crew, who took part in the Downings Bay herring fishery with the object of obtaining practical information as to the management of a large herring boat.

Between police duty and scientific research the Department's Cruiser "*Helga*" was kept very busy throughout the whole year.

THE SEA FISHERIES.

Vessels, Men, and Boys.

There were 6,235 vessels actually engaged in the sea fisheries in 1903, as compared with 6,245 in 1902, showing a decrease of 10.

This year's figures are composed of 376 first, 2,939 second, 2,790 third class boats, 79 unclassified open row boats and canoes of 18 feet and upwards in length, and 51 unclassified open row boats of under 18 feet. The net falling off above-mentioned results from an increase of 10 in the first class, 6 in second, 58 in unclassified open row boats, and a decrease of 84 in the third class. The general tendency is the substitution of large for small boats.

There were 24,206 men and 527 boys employed, being 263 men more and 57 boys less than in the previous year.

Beam trawling was carried on by 1 steam and 172 sailing boats. Otter trawling was carried on by 11 steam and 242 sailing boats. Of the steamers, 8 ranged between 46 and 66 tons, one is 21 tons, one is 20 tons, and two are 10 tons, net register. Of the sailing trawlers 286 were under 10 tons, 52 between 10 and 20 tons, 39 between 20 and 30 tons, 14 between 30 and 40 tons, 19 between 40 and 50 tons, and 4 over 50 tons.

There were about 1,500 men and 30 boys engaged in trawling. Fishing by long lines was carried on by about 5,500 men and 70 boys, in 43 first class, 841 second class, and 528 third class boats.

About 750 persons were engaged gathering oysters off the public beds.

About 4,000 persons were engaged at the lobster and crab fisheries.

About 200 persons were engaged picking mussels, 300 picking cockles, and 4,000 in gathering periwinkles.

Further details are given in the Appendices.

The number of boats engaged in the mackerel fisheries are referred to on pages xiv. and xv., and in the herring fisheries in Appendices Nos. 5 and 6.

There were 42 first, 563 second, 433 third class, and 11 unclassified, boats that did not fish during the year.

One first class boat from Portavogie and eight from Arklow attended the Scotch herring fishery; and one from Ardglass the Isle of Man herring fishery.

Review of Statistics of Fish (excluding Salmon) Landed.

According to the returns received, the total quantity of sea fish (other than shell fish) captured in 1903 was 838,412 cwts., valued at £376,049. In 1902 the corresponding figures were 634,016 cwts. and £334,783. The former, therefore, show increases in capture of 204,396 cwts., and of £41,266 in money.

The following figures will show at a glance a comparison of the takes on the different coasts during the two years:—

—		Cwts.	Value.
			£
North Coast,	1903,	69,541	33,803
"	1902,	74,087	39,273
East Coast,	1903,	205,181	104,353
"	1902,	189,026	106,801
South Coast,	1903,	274,348	113,593
"	1902,	197,953	81,683
West Coast,	1903,	289,342	124,300
"	1902,	172,950	105,026

The average price per cwt. of the total catch in 1903 was about 8s. 11½d., as compared with 10s. 6½d., in the previous year.

Including shell-fish, the total value for 1903 was £427,800, and for 1902, £402,013.

The following is a comparison between this year and 1902 in respect to quantities, values, and average prices of the different kinds of sea fish landed in Ireland:—

Brill.—The total capture of brill in 1903 was 637 cwts., valued at £1,430.

The average price per cwt. was about £2 4s. 10½d.

This fish was included in the previous year under "Other kinds (not shell fish)."

Soles.—The total capture of soles in 1903 was 3,636 cwts., valued at £14,088, as compared with 4,053 cwts., valued at £16,311, in 1902.

The average price in 1903 was almost £3 17s. 6d. per cwt., and in 1902 £4 0s. 5½d. per cwt.

Turbot.—The total capture of turbot in 1903 was 843 cwts., valued at £3,961, as compared with 1,081 cwts., valued at £3,964 in 1902.

The average price in 1903 was almost £4 13s. 11½d. per cwt., and in 1902 £3 13s. 4d. per cwt.

Cod.—The total capture of cod in 1903 was 16,741 cwts., valued at £12,454, as compared with 14,855 cwts., valued at £11,496, in 1902.

The average price per cwt. in 1903 was slightly over 14s. 10½d., and in 1902 about 15s. 5½d.

Conger eel.—The total capture of conger eel in 1903 was 7,036 cwts., valued at £4,091.

The average price per cwt. was about 11s. 7½d.

This fish was included in the previous year under "Other kinds (not shell fish)."

Haddock.—The total capture of haddock in 1903 was 8,411 cwts., valued at £7,014.

In the previous year the total capture was 7,085 cwts., and the total value £8,306.

The average price in 1903 was slightly over 16s. 8d. per cwt., and in 1902 about £1 3s. 5½d.

Hake.—The total capture of hake in 1903 was 18,831 cwts., valued at £11,808, as compared with 18,906 cwts., valued at £14,247 in 1902.

The average price per cwt. in 1903 was about 12s. 7½d., and in 1902 about 15s. 0½d.

Herrings.—The total capture of herrings in 1903 was 232,980 cwts., valued at £84,446.

In the previous year the total capture was 241,872 cwts., and the total value £93,304.

The average price in 1903 was nearly 7s. 3d. per cwt., and in 1902 about 7s. 8½d. per cwt.

Ling.—The total capture of ling in 1903 was 4,148 cwts., valued at £2,125, as compared with 5,623 cwts., valued at £2,858, in 1902.

The average price per cwt. in 1903 was almost 10s. 3d., and in 1902 about 10s. 1½d.

Mackerel.—The total capture of mackerel in 1903 was 448,217 cwts., valued at £183,865.

In the previous year the total capture was 243,004 cwts., valued at £121,270.

The average price per cwt. in 1903 was nearly 8s. 2½d., and in 1902 about 9s. 11½d.

Plaice.—The total capture of plaice was 19,242 cwts., valued at £19,018.

The average price per cwt. was almost 19s. 9½d.

This fish was included in the previous year under "Other kinds (not shell fish)."

Ray or Skate.—The total capture of ray or skate in 1903 was 8,313 cwts., valued at £2,442.

The average price per cwt. was 5s. 10½d.

This fish was included in the previous year under "Other kinds (not shell fish)."

Sprats.—The total capture of sprats in 1903 was 8,306 cwts., valued at £1,005.

In the previous year the total capture was 5,934 cwts., valued at £812.

The average price per cwt. in 1903 was about 2s. 5d., and in 1902 about 2s. 8½d.

Whiting.—The total capture of whiting in 1903 was 21,259 cwts., valued at £11,367, as compared with 23,019 cwts., valued at £13,356, in 1902.

The average price per cwt. in 1903 was about 10s. 8½d., and in 1902 about 11s. 7½d.

Other kinds (not including shell fish).—The total capture in 1903 was 39,812 cwts., valued at £16,875.

The average price per cwt. in 1903 was about 8s. 5½d.

In the year 1902 this heading included Brill, Conger eel, Plaice, and Ray or Skate, which are separately treated this year. If these fish were included under the heading "Other kinds (not shell fish)" in 1903, the comparison would be as follows:—

1903.—Total amount 75,040 cwts., valued at £43,856; average price 11s. 8½d. per cwt. 1902.—Total amount, 68,584 cwts., valued at £48,859; average price, 14s. 2½d. per cwt.

Shell Fish.

Oysters.—The returns received show that about 25,328 hundreds of oysters were taken off the public beds in 1903, and that the value thereof was £5,030. The figures for the previous year were 38,837 hundreds, and £6,977.

From the private beds, so far as returns are obtainable, about 26,875 hundreds of oysters were lifted. The value of these is estimated at £5,420. The figures for the previous year were 23,614 hundreds, and £5,378.

See also Appendices No. 12, p. 61, and No. 19, p. 96.

Lobsters.—The returns received show that about 72,698 dozens of lobsters were captured in 1903, and that their value was £29,314. The figures for the previous year were 115,684 dozens and £42,761.

See also Appendix No. 9, p. 52.

Crabs.—The returns received show that about 27,857 dozens of crabs were taken in 1903, and that their value was about £2,364. The figures for the previous year were 31,319 dozens, and £2,193.

See also Appendix No. 10, p. 56.

Mussels.—The returns received show that the weight of the mussels taken this year was about 1,061 tons, and that the value thereof was about £1,581. The previous year's figures were 1,723½ tons, and £2,243.

See also Appendix No. 13, p. 64.

Cockles.—The returns received show that about 43,661 gallons of cockles were picked in 1903, and that their value was about £1,251. The figures for the previous year were 30,562 gallons, and £885.

See also Appendix No. 14, p. 65.

Periwinkles.—The returns received show that the weight of periwinkles taken this year was somewhere about 1,630 tons, and that the value thereof was £6,520. The figures for the previous year were 1,625 tons, and £6,608.

See also Appendix No. 15, p. 66.

Shrimps.—Shrimping is not largely followed around the Irish coast. The cases mentioned in Appendix No. 11, page 60, are the only ones in which reports came to hand that shrimps had been taken. It is estimated that the value was about £269. The figure for the previous year was £185.

The total value of the shell fish, as furnished in the returns for 1903, is estimated at £51,751, as against £67,230 for 1902.

Dublin Market Returns.

During 1903 weekly returns of the sea fish passing through the Dublin market were obtained, giving, as far as possible, the districts in which they were caught.

The total quantity, excluding almost all the herrings and mackerel and shellfish, was—71,304 boxes, 7,191 hampers, and 6,892 "cleaves"; in all, some 4,743 tons weight.

Of this total, the nine steam trawlers fishing out of Dublin were responsible for 63,699 boxes, or 3,185 tons, to a value of about £35,000.

Whiting was the fish which was taken in largest quantities by them, viz. : 23,811 boxes, principally in the winter months. Next in quantity was hake, 9,311 boxes, the best months being from May to September.

Cod, haddock, ray, and gurnard, were the other kinds which were landed in large quantities. Of flat fish there were 1,034 boxes of plaice, 1,430 of dabs, 447 of black sole, 521 white sole, 85 lemon sole, 1,031 ox sole, 252 brill, 438½ turbot, and 22 of halibut.

The next most important source of supply was Howth, from where came 6,892 "cleaves," or 387 tons of fish, nearly all cod and whiting, with a little conger, ling, and ray, the boats being principally liners. The first five months in the year seem to have been the most successful for this class of fishing.

The sailing trawlers of Dublin Bay and other smaller boats supplied 2,798 hampers, or 280 tons of fish, of which 1,134 were plaice, and 677 ray, the rest of the catch consisting of many different kinds of fish, principally whiting and sole.

The fleet of sailing trawlers in Galway Bay sent 2,573 hampers, or 257 tons, principally whiting and plaice, and lesser quantities of hake, haddock, sole, &c. January, February, July, and October were their best months.

The Dingle trawlers contributed 1,820 hampers, or 182 tons, largely of valuable fish, there being 604 of plaice and 532 of black sole, the balance being made up of cod, pollack, turbot and brill. March, April, May and June were the most successful months.

At the end of February and the beginning of March the prevalence of easterly winds had the effect of checking the supplies from the East Coast, while the Dingle and Galway boats sent consignments which were the heaviest for many years.

There also reached the Dublin market from various Irish centres some 4,996 boxes or 250 tons, principally plaice and whiting, the winter months being again the most productive.

The imported fish amounted to 1,270 boxes or 127 tons, consisting principally of haddock, plaice and cod; March, September, October and December being the months in which these supplies mostly arrived.

It is satisfactory to find Dublin supplied almost entirely with home-caught fish of these kinds, as compared with other Irish centres like Belfast, which derive their supplies principally from England and Scotland.

Spring Mackerel Fishery.

It is pleasing to note that the depression in the spring mackerel fishery, shown by the figures of last year, was not of a permanent character, and that this year's figures indicate a remarkable recovery. The catch was nearly double (over 5,000 tons more), while the money earned by the fishermen was £90,015, as compared with £61,841 in 1902.

From Valentia Harbour the heaviest fishing took place (39,673 cwts.), and the railway facilities which exist at that port made it possible for local buyers to deal with the whole catch, for which £13,513 was paid to the fishermen. Baltimore comes second on the list as to catch (35,580 cwts.), while Kinsale (34,334 cwts.), Berehaven (33,965 cwts.), and Fenit (31,350 cwts.) did well, and the fishing was good all up to the Mayo coast.

A peculiarity of the season was that the fishing continued right on into July, no break being noticed in many places between

the dispersal of the spring schools of breeding fish and the influx of the young autumn mackerel; and good prices, such as 15s. per hundred, prevailed in July, which was altogether a new feature.

The good prospects in America led to a large curing business here, 10,463 barrels having been put up before the 1st of July, as compared with 572 in 1902.

On the north of Donegal, where, during the last two years, a spring herring fishing has been in operation, small mackerel were taken in the herring nets, and in such numbers that they could not be disposed of. They are not included in our statistics. The fact shows that mackerel at this time of the year had pushed further to the northward than usual, and it is hoped that some provisions may next season be made for their utilisation. They are unavoidably taken with the more valuable herrings then present in these northern waters.

The system of telegraphic intelligence between the principal stations which had worked with success in 1902 was continued during the present season, the method adopted being the same, and the following is a general review of the intelligence that was circulated twice weekly during the fishing season:—

Although a few fish were taken early in April, the fishing may be taken as having commenced at about the same time as in the previous year—viz.: the week ending on April 18th—and to have lasted until July 11th.

As a result of the comparative success of the eastern stations in 1902, a large number of boats assembled there at the beginning of this season, but their number rapidly decreased in May and June owing to the fact that the fish were found in greater quantities to the westward.

To take the stations seriatim:—

At Kinsale a few fish were caught as early as April 1st, but it was not until the latter end of the month, when 180 boats were fishing, that the takes were of any considerable amount. The best week was that of May 11th, when 122 boats fishing on three nights landed 4,520 boxes, an average of 12·3 boxes per boat per night (a box containing about 1 cwt. of fish). This average does not compare favourably with the best one of the previous year, viz.: 27·6 for the week of May 10th. The season ended here on June 27th.

At Baltimore the season also started badly, with the result that after five week's fishing the number of boats sharply declined from sixty-seven to twenty or thirty. The best week was that of May 23rd, when twenty-nine boats, fishing on four nights, landed 6,163 boxes, an average of 53·1. This average is far in excess of all records from any station during the previous season. Fish were landed in small quantities during the week of April 11th, and were still being taken on July 18th.

At Castletownbere there was no large gathering of boats at the commencement, only three fishing on April 25th, but later on the information of the catches conveyed to the other stations by our telegrams seems to have attracted boats from the eastern ports,

with the result that during the week of May 30th seventy boats were fishing at Castletownbere, and the numbers were fairly well maintained until the end on July 11th. The best average catch for a week was that of May 16th, when five boats on three nights landed 572 boxes, an average of 38·1, with the result that during the next week twenty-five boats fished, and during the following one seventy, catching 11,913 boxes in five nights, an average of 34.

At Valentia the heavy fishing was commenced by twenty-three boats during the week of April 18th, and continued until June 27th. The best week was that of May 23rd, when forty boats on four nights, landed 6,185 boxes, an average of 38·7.

At Fenit fifty-three boats fished during the week of April 18th, but the good fishing did not begin until the week of May 23rd when the number of boats had decreased to twenty-eight, which took 11,086 boxes on five nights, an average of 79·2. This latter figure is far in excess of that for any other station, and is about double the best of the previous season. The average (63·8) was again good during the week of June 6th. The fishing ended about the 20th of that month.

At Arran Islands there was a welcome change from the disastrous preceding season. A few fish were taken early in April, the best weeks being those of May 9th and June 6th, which showed averages of 27·9 and 29·1 respectively. The highest average during the previous season was only 10·5. The Arran boats ceased fishing about the middle of June, but the Roundstone boats fishing on the same coast did very well up to the end of July, and profited by the rise in prices.

Taking the stations collectively, the first week during which all were at work, was that of April 25th, when the average number of boxes per boat per night for all stations was 4·6, the following weeks showing averages of 6·1, 18·0, 18·6, 32·9, 20·4, 31·9, 14·3, and 23·9, on that of June 20th. The best average weeks are thus—those of May 23rd and June 6th. These figures show a great improvement on those of the previous season.

Autumn Mackerel Fishery.

Stormy weather prevailed throughout all the fishing seasons of 1903, and prevented the fishermen from fully availing themselves of the abundance of fish which was off the coast; and as gales from the South were most frequent, those parts exposed to that point suffered in the greatest degree. Notwithstanding these unfavourable conditions, the past year's catch of autumn mackerel showed a great improvement on those of the preceding years, and was, from this point of view, the best since 1899. The cash paid for fish was about £94,000, and the number of barrels cured for the American market was 54,183.

On the south coast a considerable fleet of first-class boats engaged in this fishery, those belonging to Irish ports numbering over 100. There were also thirteen Cornish boats. This fleet worked from three to ten miles off the shore. At the same time a large number of small craft followed the fishing close to land—on the west of Kerry and Clare the bulk of the fishing was done by canoes.

That part of the coast which showed the greatest increase in fish caught was the south shore of the Kenmare River—from Ardgroom to Dursey Island. In this district the industry is carried on by row-boats, and the value of the mackerel landed amounted to a sum of about £23,300, while several thousands of pounds were earned by the fishermen's families in curing the fish. On the Dingle peninsula large takes were also made, and about £15,000 came to the fishermen. The local curers also did good business by selling on the spot, at a good profit, their barrels of cured mackerel to agents of American firms.

One of the poorest coasts of Ireland is that of North Mayo, from Broadhaven to Killala Bay; but along these shores the fishermen were paid, during the autumn mackerel season, over £5,000, which compared favourably with the amount (£1,686) that they earned in 1902.

For full details of this fishery the tables in the Appendix No. 4, p. 14, must be examined; and in the chart between pages vi. and vii. the relative importance of this year's catch can be noted.

The following are the numbers of Irish boats attending this fishery in 1903:—

Irish, 1st Class,	134
" 2nd "	627
" 3rd "	1,293
" unregistered,	16

Summer Herring Fishery.

The herring fishing, which began in the spring and continued through the summer, showed a falling off of 20,000 cwts. in quantity, but only of about £1,000 in value, as compared with the similar season of 1902. The reason for the apparent want of proportion between quantity and price is that the heaviest deficiency in fish occurred on the East coast, where a cheap class of herring is usually taken. The decrease at Ardglass, for example, amounted to 10,000 cwts., but there was an increase on the coast of Donegal, where very high prices were the rule. At Downings Bay, while the increase in the amount of fish landed was only 500 cwt., that in cash paid was over £3,400.

The whole of this summer herring fishing brought in over £30,000, but undoubtedly a great portion of the amount was earned by Scottish boats—the large Irish boats being at the early part of the season engaged in the mackerel fishery. On the Donegal coast the few local boats which took part in the fishing did well. Twelve steam drifters worked from Lough Swilly and Downings Bay. The fish lie far away at sea, and none but large sea-going boats can deal with this branch of the industry.

The by-law which was made by the Department prohibiting the landing of herrings on the north of Donegal before the month of May, worked well; and although there were a few objections before it came into operation, the general consensus of opinion among the fishermen and buyers turned to be in favour of it, and the result was a larger take of high-class fish. All the fish cured in this district went to Germany, where they fetched the highest prices that were paid in that market.

On the west coast of Donegal the fishing was not as good as in 1902. The same may be said for that off the Arran Islands, but the spring fishing from Kinsale was better than in the previous year.

Particulars will be found on pp. 20–23.

Autumn and Winter Herring Fishery.

The storms of 1903 affected the Autumn Herring Fishing, making its prosecution in some districts quite impossible. The total catch was 177,517 cwts. being about 1,150 tons greater than in the previous similar season, while the amount realized by the fishermen (£56,599) was about £4,500 less.

There was a complete failure of the fishing at Dunmore East.

At Downings Bay on the Donegal Coast great preparations were made in October; and the largest fleet of Irish and Scotch boats that have ever been there assembled; but week after week dragged on without any fishing. At last the bulk of the fleet left, and almost all the local boats were laid up. Then, in the very end of the year the herrings appeared, and a good fishing by local boats lasted well on into January. The catch however was only 6,129 cwts. compared with 17,792 cwts. in 1902.

On another part of the Donegal Coast (Dawros Bay) there was an unexpected development of herring fishing; and the amount landed (24,000 cwts.) compared well with that (7,300 cwts.) in the previous year. Unlike the Downing's Bay fishing, these herrings were all taken by small yawls; and this proved to be the most remarkable feature of what was generally a bad season.

There was an improvement on the East Coast, the catches at Kilkeel, Balbriggan, and Howth being about double those of the preceding Autumn and Winter.

The curing of herrings for the local markets was carried on at Galway. The chief centres for curing for export are situated on the Donegal Coast, where high prices prevailed, most of the fish being sent to the American and Continental markets.

The number of barrels cured was only 11,669, compared with 16,757 in 1903.

Particulars will be found on pp. 24-33.

Loans.

There were received during the year 120 applications, from 157 persons, for loans amounting to £2,978 4s. 10d. Of these there were recommended 114 loans to 150 persons, to the amount of £2,723 11s. The sum actually issued during the year was £2,682 18s. 11d.

Since the passing of the Purchase of Land and Congested Districts (Ireland) Act, 1891, under which a sum of £20,000 was reserved for administration in non-congested districts (which fund has been placed at the disposal of the Department by the Act 62 and 63 Vic., cap. 50), the sum of £31,997 9s. 2d. was advanced by way of loan up to the 31st December, 1903. The promissory notes signed to secure principal and interest amounted to £34,460 8s. 0d. The repayments were £26,652 10s. 0d.; the outstanding notes not arrived at maturity £7,100 2s. 2d., of which, however, £149 15s. 0d. is known to be irrecoverable. The arrears on the £34,460 8s. 0d. consisted of £707 15s. 10d., of which £203 18s. 6d. are irrecoverable. It will be thus seen that the *bad debts* are a little over 1 per cent.

On 31st December, 1903, the Fund stood thus:—

	£	s.	d.
Government Stock,	20,000	0	0
Cash,	1,354	13	6
Outstanding Promissory Notes not arrived at maturity (less £149 15s. 0d. known to be irrecoverable),	6,950	7	2
Arrears (excluding £203 18s. 6d. irrecoverable),	503	17	4

The work of actually issuing these loans and collecting the repayments, which was formerly carried out by the Board of

Works, devolves on this branch of the Department as from 1st April, 1904.

Further particulars in connection with these loan transactions will be found in Appendix No. 16, pages 68-71.

Casualties.

The number of fishermen who lost their lives, in the year ended 30th September, 1903, while actually in pursuit of their calling, was sixteen, as compared with nineteen in the previous year. Three were drowned while conveying seaweed, provisions, materials, &c., and when engaged in work not immediately connected with fishing. There were the same number of casualties of that nature last year.

Four first, fourteen second, and nineteen third-class boats were lost this year while engaged in fishing, as compared with six first, eleven second, and five third class, respectively, in the previous year. Three first, seven second, and nineteen third-class boats were seriously damaged, as compared with one first-class boat and one second-class in the previous year. Three first-class boats were wrecked when engaged in work not immediately connected with fishing, as compared with a first-class and a third-class in the previous year.

The following are the particulars of the casualties, as furnished by the Coast Guard Officers at the various Stations:—

From Howth Station.—A fisherman was drowned in Howth Harbour on 30th March, 1903. It is supposed that he fell overboard.

From Ringsend Station.—During a storm in February, 1903, a second-class boat sank in the Alexandra Basin. She was not raised, being very much damaged. The skipper of a first-class sailing trawler was drowned off Lambay in April, 1903. In September following, in the same vicinity, a boy belonging to another first-class trawler fell overboard and sank immediately.

From Arklow Station.—A third-class boat foundered during a squall in Arklow Bay on the 17th December, 1902. Four men thereby lost their lives. A second-class boat was run down in Arklow Bay whilst herring fishing on 19th of the same month. She became a total wreck. The crew were saved.

From Wexford Station.—A first-class boat, when returning from the fishing-ground, ran ashore on the point of Rosslare Fort. Endeavours were made to float her, but without success.

From Crosshaven Station.—In September, 1903, two second-class boats were washed ashore and broken up on the beach.

From Ring Bar Station.—On 10th September, 1903, two second-class boats, hauled up on the shore at Barry's Cove, were washed away.

From Galley Head Station.—A second-class boat was broken up during a gale on the night of the 27th September, 1903.

From Castletownsend Station.—On 19th August, 1903, a fisherman fell from the boat "Safe Return," while proceeding from Baltimore to Ballycotton, and was drowned.

From Castletownbere Station.—A fisherman was drowned when returning from the shore to his vessel on 22nd June, 1903.

From Ballinskelligs Station.—Two third-class boats were damaged by a heavy sea whilst being beached at Boat Cove on the 21st September, 1903.

From Knightstown Station.—A third class boat foundered off Bray Head in a heavy sea on the 22nd September, 1903. The crew were saved.

From Caherciveen Station.—Three third-class boats were washed off the strand at Coosroom on the 12th December, 1902, and were not recovered.

From Dingle Station.—During the night of the 26th February, 1903, a severe storm caused a first-class vessel to break from her moorings and collide with another boat of the same class. Both vessels sank. One of them was floated and repaired, but the other was totally wrecked. A first-class boat was also damaged.

From Fenit Station.—In January, 1903, a second-class vessel broke from its moorings, collided with the pier, and became a total wreck.

From Kilcredane Station.—In February, 1903, a canoe was washed from the beach near Carrigaholt and totally destroyed. On 10th September, 1903, a canoe, running for shelter, struck Beale Point, and was immediately broken up.

From Kilkee Station.—Five canoes were washed away and broken up during the storm of the 26th and 27th February, 1903.

From North Arran Station.—On 6th February, 1903 a canoe, returning from hauling her nets, was swamped during a squall. Two of the crew were drowned. A first-class boat was also lost. It struck on a reef of rocks at the south end of Straw Island on the 18th December, 1902, and could not be got off.

From Rosmoney Station.—A third-class boat was totally lost in Cleggan Bay in August, 1903, whilst landing fish from a first-class vessel.

From Ballyglass Station.—A fisherman, whilst returning from market at Belmullet on the 17th December, 1902, was drowned. His boat capsized off Moyrahan Point.

From Ballycastle (Co. Mayo) Station.—Whilst fishing for bream in the month of August, 1903, a man was washed off the rocks and drowned.

From Rosses Point Station.—Four third-class boats were smashed by a heavy sea on 27th February, 1903.

From Teelin Station.—A third-class boat was blown over a cliff, and broken up on the rocks below, on the 15th March, 1903.

From Malinmore Station.—An exceptionally high tide, on 16th December, 1902, washed a second-class boat from the slip. The vessel was completely broken up on the rocks.

From Portnoo Station.—A man was drowned whilst herring-fishing at Rosbeg on 11th December, 1902, and two second-class boats were destroyed by a gale on 24th February, 1903.

From Mulroy Station.—On the 15th October, 1902, a second-class vessel was totally destroyed, and a first-class and seven second-class boats damaged, owing to the parting of some of their cables and the collision of the vessels with each other.

From Malin Head Station.—A fisherman was drowned whilst picking limpets for bait on Inishtrahull Island in November, 1902.

From Larne Harbour Station.—In the middle of February, 1903, a fisherman was drowned when engaged in trawling.

From Portaferry Station.—Two fishermen who had been employed piloting a vessel to Killyleagh on the 10th January, 1903, were found two days later on Jackdaw Island frozen to death. Their boat, which lay beside them, was broken.

From Carlingford Station.—A fisherman was drowned whilst putting fresh water on board a fishing vessel in Carlingford Lough on 15th August, 1903.

From Giles Quay Station.—Two second-class boats were broken up on the beach by the gale on the 26th February, 1903.

From Balbriggan Station.—A first-class vessel stranded on the Cardy Rocks on the 16th July, 1903, and became a total wreck.

Piers and Harbours.

In the Report of the Inspectors of Irish Fisheries for the year 1894, a return was given relating to works under the Sea Fisheries (Ireland) Act, 1883 (46 and 47 Vic., c. 26), up to the 31st March, 1895.

Since that time particulars of the yearly expenditure under the Act have been given in the Annual Reports of the Fishery Authorities.

The expenditure during the year ended 31st March, 1904, was as follows:—

Pier Works.	£	s.	d.
Ardmore,	486	0	11
Portstewart,	12	15	10
Portavogie,	1,802	11	9
	<hr/>		
	2,301	8	6
Engineering Staff Expenses, .	362	17	6
	<hr/>		
	£2,664	6	0

¶ The following sums were offered during the year by the Department, at the instance of this Branch, by way of contribution to the cost of marine works:—

At Ardmore, Co. Waterford, where £1,000 had been previously promised, a further sum of £200 was guaranteed for the purpose of meeting the total liability involved in the construction of a breakwater, slip and pathway at that place.

At Minard, Co. Kerry, a sum not exceeding £300, being one half the estimated cost of the construction of a new boat slip.

At Foynes, Co. Limerick, the sum of £450 towards the expense (£900) of repairing the quay at that place.

At Liscannor the sum of £2,833, being one-third the estimated cost of improving the harbour, so that the special State assistance provided by the Marine Works (Ireland) Act, 1902 (on condition that this one-third were forthcoming), could be availed of.

At Salthill, Co. Galway, £500 towards cost of erecting a pier.

At Buncrana, Co. Donegal, one-third the expense of a proposed pier extension—the Department's grant not to exceed £2,000.

At Port-an-dhu, Co. Antrim, one-half (within a limit of £1,500) the outlay in rebuilding the breakwater and boat slip.

At Loughshinny, Co. Dublin, half the estimated cost of £3,000 of extending the pier.

The promised contributions of £137 10s. for clearing out Ballinagoul Harbour and £100 (part of £175) for improvements in the landing accommodation at Ballycastle, Co. Antrim, were actually paid by the Department during the year.

Marine Superintendence.

Between the month of March, 1903, and the date of this Report the cruisers at the disposal of the Department captured five steam trawlers working in areas closed to that mode of fishing. The magistrates imposed fines in one case of £30, in two of £5 each (and nets forfeited) in one of £100, and in one of £10. Costs were awarded in all cases.

The s.s. *Helga* also seized two herring nets that were found set during prohibited hours off the Donegal coast.

LEGISLATION.

The Ulster Electric Power Bill, which was introduced into Parliament in February last, proposed to take water for motive power from the rivers Bann and Erne in such quantities as, in the opinion of this Branch, to seriously affect the fisheries of these rivers. Failing to arrive at a suitable arrangement with the promoters, a Departmental Petition against the Bill was lodged. As a result, the promoters decided to abandon that portion of their scheme affecting the rivers in question.

A Bill was introduced into the House of Lords at the instance of the Board of Agriculture and Fisheries (England) having for its object the prohibition of the landing of undersized flat fish. The chief aim of the promoters was to protect certain fishing grounds in the North Sea; but as it was desirable that the Act should be applicable to all the coasts of the British Islands, this Department were invited to express their opinion on the measure before the Select Committee to whom the Bill had been referred.

The measure had not, at date of this Report, passed through Parliament.

INLAND FISHERIES.

Salmon Fisheries.

The satisfactory condition of the salmon fisheries in 1902 has continued in 1903, the amount of fish captured again being in excess of that in the previous year. The returns received by the Department from the railway companies show an increase of six per cent. in the amount carried over their systems.

The value of the salmon and trout fisheries is at present probably between £350,000 and £400,000, of which some £60,000 is what the Department estimate to be the nett profit of private proprietors, the balance being the amount derived by the public from the industry, and this value is nearly equal to that of all the sea fish landed in Ireland.

Salmon fishermen exercising the public right of fishing in the sea, employes of private proprietors, bailiffs and professional anglers, all of whom were men more or less dependent on this industry, numbered about 10,000.

Sixteen of the fishery districts report an improvement, two no change, and six a decline in the amount captured as compared with 1902. In the Waterford district the open season for salmon was the best for the past twenty years. In the Skibbereen and Dundalk districts also the improvement was remarkable.

Very large takes of salmon and grilse were made by drift nets fishing at sea off the North and North-west coasts, as many as 160 fish being taken in one haul, and some boats' crews earning £150 each. This fishing lasts only five or six weeks, and extends to a distance of six miles from the land in places.

The reports on angling are, in nearly all cases, most satisfactory, the weather conditions being, on the whole, favourable.

Offences against the fishery laws have diminished in sixteen districts, in two show no change, and in seven have unfortunately increased, but in only one case, viz., Sligo, has the increase been great. The position of affairs in this respect is satisfactory, as, with a larger supply of fish, a greater amount of poaching might have been expected.

Cases of malicious poisoning of rivers by lime or spurge show a welcome decrease, there being only six reported. Of these, two occurred in the Kenmare district, which has in past years been distinguished for the prevalence of this offence. Three cases of killing fish with an explosive occurred in the Limerick District, but unfortunately the perpetrators were not detected.

The Department altered the form of the licence for stake nets in the Limerick District, so that each licence will in future indicate the particular fixed engine for which it is issued.

An inquiry was held into the working of a By-law dated 17th February, 1871, in the Ballina District, by which angling for trout was restricted during the descent of salmon fry. A new By-law relaxing to some extent these restrictions was made by the Department.

Contributions to the funds of Conservators for protection were,

on our recommendation, made by the Department in the Waterford, Dublin, Killarney, Skibbereen, and Drogheda districts, on conditions which seemed suitable in each case; and financial aid was also given to the Lough Mask Angling Association for the protection of trout.

A sum was also allocated for the improvement of the fish-passes on the rivers Glyde and Dee, provided certain conditions were locally complied with.

The output of Salmon and Trout fry from hatcheries was not so large as in 1902, the number being approximately 4,800,000 from 24 hatcheries.

This decrease was due in many cases to the difficulty of capturing spawners in consequence of the very general prevalence of floods throughout the year. The fact that the conditions of natural spawning were improved by the same state of affairs is a compensation for the decrease.

Full details of the hatchery operations will be published in Part II. of this Report.

The total number of rod licences issued was 2,931, compared with 2,533 in 1902. As to engines used in the tidal waters by fishermen who fish on common law rights, the number of draft net licences issued was 699, an increase of 17 on the previous year; and drift nets, 372, an increase of 33.

The total amount received by Boards of Conservators for licences in 1903 was £9,795 15s. The total ten per cent. rate collected on the poor-law valuations of fisheries was £859 16s. 6d. Fines, and the sale of forfeited engines, &c., produced £897 5s. 4d., and subscriptions came to £1,841 8s. 1d. The grand total was £13,394 4s. 11d., as compared with £12,602 16s. 8½d. in 1902.

See Appendices No. 24, p. 142, and No. 27, p. 162.

Pollen Fisheries.

The amount of pollen captured in Lough Neagh during 1903 was somewhat greater than in the previous year. Over 95 per cent. of the take is exported. There were 372½ tons so dealt with, as against 338½ in 1902. At an average price of £16 a ton, the value of the export would be £5,960.

Licences were issued in 1903 for 85 trammel and 172 draft nets for pollen, producing £343. It requires two men to work one of these engines.

Many scientific and other reports have been received during the year; and this opportunity is taken of thanking those who placed at the disposal of the Department the valuable information they contain.

Great assistance in the enforcement of the salmon fisheries laws, and in the investigation of numerous matters of detail arising out of our administration of the loan funds, was rendered by the Inspector-General, Officers, and men of the Royal Irish Constabulary, and also by the Officers, Warrant Officers, and men of the Coast Guard in so far as they were permitted by the orders of the Lords Commissioners of the Admiralty; and the Fishmongers' Company of London have continued the important assistance hitherto rendered, and which has had a marked effect in the direction of the suppression of salmon poaching in Ireland.

We have the honour to be,

Sir,

Your obedient servants,

33	1,370 0 0	100	Only a small stock of saleable oysters on beds at present, owing to bad weather during the past three seasons. 23,203 have been taken up and sold, value £106. Very little fall of spat.
37	226 0 0	10	No report received.
46	150 0 0	150	Bed in good condition. About 200 oysters, value £1 10s., taken up for private use. Good fall of spat observed.
114	294 2 0	50	Bed is in good condition; it has been cleaned. 4,000 oysters, value about £20, taken up and sold. None laid down. There was a fall of spat, but not in any quantity. Foreign oysters never succeeded; they nearly all died.
115	810 0 0	30	Bed is in a good state. 150,000 oysters taken up and sold, value £310. 80,000 oysters from public oyster bed, east of Bird's Island, near Clarentbridge, and 50,000 from Tralee, laid down. There was a fall of spat.
140	153 3 3	—	Worked conjointly with No. 33.
170	602 3 3	—	Bed clean and in good condition. Only a sample taken up. No fall of spat observed.
171	320 3 0	—	Bed clean and in good condition. Only a sample taken up. No fall of spat observed.
County Mayo.			
8	108 3 33	4	Bed fairly clean. A good number of young oysters on it. About 3,000 taken up for home consumption. A large fall of spat observed.
161	12 1 20	3	Bed is in a good state, and has been worked generally. About 5,000 oysters, value £23, have been taken up; 7,000 obtained locally, laid down. Small fall of spat.
144	4 1 10	4	Bed is in good condition; has been improved. 1,000 oysters taken up and sold for £5. 1,500 small oysters from Clew Bay laid down. Fair fall of spat.
172	44 0 37	10	Bed is in a good state. 1,000 oysters taken up and sold, value £3. 2,000 Clew Bay oysters laid down. Very little fall of spat.
174	375 0 0	—	Bed has been dredged for cleaning purposes and to observe growth of young oysters. Only a sufficient number of oysters have been taken up to enable progress to be observed. Fall of spat appears to be small, and efforts to collect it have not met with much success. The strength of the tide appears to prevent the retention of spat. Brittany oysters have done well, but Portuguese oysters failed.
175	125 0 0	—	Bed is well preserved, and stones laid down for protection. Some oysters taken up, but not for sale. It is believed that there has been a fall of spat.
177	317 2 20	—	Bed is in a fair state. About 80 oysters taken up for private consumption. No fall of spat observed; supposed to be carried off by tide, which runs rapidly in this locality.
178	1 0 32	—	Bed not yet completed. About 1,200 Tralee and 4,000 Bellinaghur Bay oysters laid down. About 3,000, value £12, taken up and sold. No fall of spat observed.
County Sligo.			
7	132 1 28	10	Bed in good condition. Has been cleared of weeds and stones, and old shells laid down to collect spat. There has been a slight fall of spat. This bed is worked and cultivated along with No. 163, and the report on this bed is applicable to bed No. 163.

APPENDIX No. 20.

ABSTRACT of BY-LAWS, ORDERS, &c., in force at date of this Report relating to the SALMON FISHERIES of IRELAND.

Place affected by By-Law, and Date thereof.	Nature of By-Law.
River Liffey. (19th Jan., 1865.)	SALMON AND TROUT. Dublin District. Prohibiting the catching, or attempting to catch, Salmon with any Net of greater length than 350 yards, in that part of the River Liffey which is situated between the Weir known as the Island Bridge Weir and a line drawn due North from Poolbeg Lighthouse.
Between Dalkey Island and Wicklow Head. (15th Oct., 1874.)	Permitting use of Nets with Meshes of one inch from knot to knot for capture of Salmon or Trout between Dalkey Island and Wicklow Head.
Broad Meadow Water and Swords River. (26th Aug., 1884.)	Prohibiting to have in possession for the purpose of taking fish, or with intent to take fish, at any season of the year, on or near the banks of the Broad Meadow Water and Ward or Swords River, any Spear, Lyster, Sarskehaul, or Gaff (except a Gaff for the purpose of being used solely as auxiliary to angling for Salmon legally with Rod and Line).
Whole District. (29th Aug., 1893.)	Prohibiting to beat the water, or to throw stones or other missiles therein, for the purpose of driving Fish close in to the Banks of any River within the District.
River Slaney (12th Aug., 1881.)	Wexford District. Prohibiting the practice of keeping Nets on board Boat between Sunset and Sunrise, during the Annual Close Season for Salmon and Trout, in that part of the River Slaney situated between Ferryarrig Bridge and the Town of Enniscorthy.
River Slaney. (12th Oct., 1882.)	Repealing By-law dated 4th March, 1862, which prohibited the use of nets with meshes of less size than one-and-three-quarter inches from knot to knot, during the open season, in that part of the River Slaney between Ferryarrig bridge and Enniscorthy.
River Slaney. (23rd Dec., 1893.)	Repealing so much of the By-Law dated 12th October, 1882, as permitted the use of Nets with meshes of one-and-a-quarter inches from knot to knot, in the Tidal Waters of the said River Slaney, and in lieu thereof permitting the use of Nets with meshes of one-and-a-half inches from knot to knot (or Six inches to be measured all round each such mesh, such measurements being taken in the clear when the Net is wet), for the capture of Salmon or Trout in the Tidal Waters of the said River Slaney, and its Tributaries, during the Open Season for the capture of Salmon and Trout.
River Slaney. (29th March, 1900.)	Prohibiting to use any Net at or near that part of the Mouth of the River Slaney comprised within the space bounded by imaginary lines drawn from the Coast Guard Watch House on the Townland of Rosslarefort to Ballisk Bank; from Ballisk Bank to Raven Point; from Raven Point to Molly's Quay; from Molly's Quay to Maguire's Quay; thence to Cull Quay; and thence to the Wharf on the aforesaid Townland of Rosslarefort.
River Slaney and Tributaries. (30th April, 1894.)	Prohibiting the use of any Net for the capture of Salmon and Trout, save a Net duly licensed in that behalf, in that part of the River Slaney, situate between Wexford Bridge and Ferryarrig Bridge, and the Tributaries falling into that portion of the said River Slaney.
River Slaney and Tributaries, from Enniscorthy Bridge to Sources. (13th Dec., 1898.)	Prohibiting to beat the water or throw stones or other missiles in that portion of the River Slaney and its tributaries extending from Enniscorthy Bridge to the sources of the River Slaney and its tributaries, for the purpose of driving fish close in to the banks of the said River and said tributaries.

APPENDIX No. 20—continued.

ABSTRACT of BY-LAWS, ORDERS, &c., in force at date of this Report relating to the SALMON FISHERIES of IRELAND—con.

Place affected by By-Law, and Date thereof.	Nature of By-Law.
Wexford District—continued.	
River Slaney and Tributaries, (13th April, 1899.)	<p>1. Prohibiting to use any Drift Net in the River Slaney and its Tributaries inside the defined mouth thereof. (Repealed. See By-Law of 2nd December, 1902.)</p> <p>2. Repealing the By-Law dated 23th March, 1854 (prohibiting the use of Nets of any kind in the River Slaney between Ferry Carrig Bridge and the Town of Enniscorthy, during the Close Season for Salmon), and in lieu thereof prohibiting to use any Net for the capture of any kind of Fish in the River Slaney and its tributaries above Wexford Bridge, during the Annual Close Season for the capture of Salmon and Trout by Nets in said part of said River and Tributaries.</p> <p>3. Prohibiting to heat the waters of the River Slaney and its Tributaries below or seawards of Enniscorthy Bridge, with a stick or other implement, or to throw stones or other missiles therein, for the purpose of injuring fish which may be therein, or preventing the capture or killing thereof.</p>
Ditto, (2nd Dec., 1902.)	<p>Repealing No. 1 of the By-Laws of the 13th day of April, 1899; and enacting the following By-Law:</p> <p>It is hereby prohibited to use Drift Nets in the River Slaney, inside the defined mouth thereof, with the following exception, namely:—Drift Nets with meshes not exceeding one and a quarter inches from knot to knot, or five inches in the round (measured when the net is wet) if used for the capture of herrings during the months of October, November, and December in each year, within that part of the above prohibited area which lies between the following imaginary lines:</p> <p>(a) On the east, straight lines from Raven Point to Molly's Buoy, from Molly's Buoy to McGuire's Buoy, from McGuire's Buoy to Cull Buoy, and from Cull Buoy to the Wharf on the Townside of Rossmore.</p> <p>(b) On the west, a straight line from the Patent Slip in the dockyard of the town of Wexford, drawn in a north-easterly direction to the Stone Beacon on the Training Wall, and thence a line following the line of the said Training Wall, to the point where it shuts the land.</p>
Ditto, (30th March, 1900.)	Prohibiting to shoot, or snare, or grieve for fish in any part of the River Slaney and its tributaries above Edmunde Bridge.
Ditto, (30th May, 1900.)	Prohibiting to use any Night Line for the capture of any kind of fish in any part of the River Slaney and its tributaries above Edmunde Bridge.
Derry Water and River Derry, (26th Oct., 1870.)	Permitting use of Nets for the capture of Fish, having Meshes of one inch from knot to knot (to be measured along the side of the square, or four inches, to be measured all round each such Mesh, such measurements being taken in the clear when the Net is wet), in the rivers and streams following, that is to say, in the Derry Water, from its source near Killyveney to Annasragh Bridge, with the stream flowing into same from Moyne Church through Bollington, and the Tomasskein River; and in the Green Island, Shillagh, and Derry River, from the bounds of the County Carlow, flowing past Tinnahely by Skillich to the house of the County Wexford, with the small streams flowing into that portion of the said river, all said rivers and streams being in the County Wicklow, for and during the months of May, June, July, and August, in each year.
Potter River, (26th Oct., 1870.)	Permitting use of Nets for the capture of Fish with Meshes of one inch from knot to knot (to be measured along the side of the square, or four inches to be measured all round each such Mesh, such measurements being taken in the clear, when the Net is wet), in the tidal portion of the Potter River, situated below Brittas Bridge in the County of Wicklow.

Conservators relative to Salmon Fisheries.

Has the take of Sea Trout by nets and weirs been more, or less productive this year than in the past one?	What is your report as to Angling in the District?	What was the highest wholesale price given for Salmon this season?	What was the lowest wholesale price?
Less productive, . . .	Exceptionally favourable in March, April, and May; more Salmon than usual were taken in the upper waters.	s. d. 2 8	s. d. 0 10
More productive, . . .	Improving, owing to wet season, . . .	2 6	0 9
Very little netting for Sea Trout.	The last season since 1883, especially in the Upper Suir.	2 6	0 10
More productive, . . .	The angling for both Salmon and Trout was good.	2 0	6 10
About the same, . . .	Fairly good,	3 0	1 0
More productive, . . .	Good; best season for several years, . . .	2 8	0
More productive, . . .	Very good for both Salmon and Trout, . . .	1 3	0
Less productive, . . .	Very good,	0 9	0 8
No nets for Sea Trout used in this District.	Very little angling carried on in the District.	2 0	0 8
Very few Sea Trout taken in the District by nets.	Not good for Salmon, but very good for Sea Trout.	6 0	0 10
About the same, . . .	A good all round season; some anglers took 60 Salmon during the season.	2 11	0 7
This kind of fishing is never of any consequence in Shannon.	In some districts angling was very much better than last year, in others not.	2 7	0 10
Less,	Bad in Spring on account of high floods; fairly good in summer and Autumn.	2 8	0 8
—	Good in Rivers Gowla, Scrooh, and Upper and Lower Castelle; fair in other rivers.	—	—
Very much less, . . .	Very good,	1 0	0 7
Less productive, . . .	Very good,	3 6	0 8
No,	Fairly good,	2 6	0 9
No,	Much improved,	3 9	0 8
